Math AE Program

for Incoming Fashion Institute of Technology Students

INSTRUCTOR:	Kangmin Cho, Adjunct Professor Department of Applied Mathematics and Statistics, SUNY Korea.
OFFICE:	B508
PERIOD:	July 22 (Mon) to August 2, 2024 (Fri). (2-week)
CLASS:	9:30 – 12:30 pm (3 hours) Classroom details will be announced by the school official.
EMAIL:	kangmin.cho@stonybrook.edu

TA: TBA

Course Goals and Description: This program is designed for incoming students to Fashion Institute of Technology, SUNY Korea, to prepare their basic math knowledge before entering the first semester. Through this program, students will be able to attain necessary skills for mathematics and sciences courses.

Topics to be Covered: This program will cover basic mathematical topics such as prealgebra (fractions, percents, decimals, ratios and proportions, rounding and estimating, measurement systems), algebra (linear equations and inequalities, and systems of linear equations), and some selected topics from advanced mathematics (geometry, statistics).

Course Material: There will be no required textbooks. I will provide lecture slides and/or readings. If you wish to further review the materials, I recommend the following two books:

[1] "Basic College Mathematics" by Marvin L. Bittinger, Judith A. Beecher, and Barbara L. Johnson, Pearson, 2019. ISBN: 978-0-13-468962-3

[2] "Prealgebra & Introductory Algebra" by Julie Miller, Molly O'Neill, and Nancy Hyde, McGraw Hill, 2020. ISBN: 978-1-260-57004-5

Expected Work for Students:

[1] FIT Accuplacer Placement Exam

Please review the below website to learn more about your upcoming placement exam in math: https://www.fitnyc.edu/admissions/undergraduate-applicants/placement-tests/math.php

[2] Homework Assignments

There will be several homework assignments in this session. Students will submit the assignments to the TA. Please hand-write on paper neatly and number the solutions accurately. You may freely discuss the questions with your classmates, TA, or tutors. However, your work should be original.

Tentative course schedule:

Week	Date	Day	Topics to Cover
1	7/22	Mon	Diagnostic Test (3:30 – 5:30 pm)
	7/23	Tue	Whole Numbers Integers and Algebraic Expressions
	7/24	Wed	Solving Equations Fractions and Mixed Numbers Review
	7/25	Thu	Decimals Ratios, Proportions, and Percents Review
	7/26	Fri	Measurement and Geometry Introduction to Statistics and Probability Review
	7/27	Sat	Linear Equations and Inequalities Graphing Linear Equations in Two Variables Review
2	7/29	Mon	Systems of Linear Equations in Two Variables Polynomials and Properties of Exponents Review
	7/30	Tue	Factoring Polynomials Rational Expressions and Equations Review
	7/31	Wed	Radicals Quadratic Equations, Complex Numbers, and Functions Review
	8/1	Thu	Special Topics from FIT Upper-level Math Courses Diagnostic Test
	8/2	Fri	Closing Ceremony (10 am)
